Free Radon Mitigation Class

Thursday, June 4, 2015
5:30 - 7:30 pm
Glenwood Springs Middle School

In Garfield County, 40 percent of homes have tested above the EPA radon action limit. Radon is the leading cause of lung cancer in non-smokers, causing an estimated twenty thousand deaths in the U.S. each year.

The class will include information on radon and the mitigation process, dinner, and a tour of a mitigated home.

To learn more, please call Garfield County Public Health at 970-665-6383 or go to www.garfield-county.com.
