TRAVEL ADVISORY & EVENT ANNOUNCEMENT

January 11, 2019

Alternating One-way on 27th Street Bridge and Periodic Holds for Construction Access

Prepare for delays at 27th Street, S. Grand Avenue and on Atkinson Trail

GLENWOOD SPRINGS, CO – 27th Street Bridge Project traffic impacts will be ramping up starting next week. On Monday, January 14, from approximately 7 AM to 5:30 PM, it is anticipated that one lane will be closed on the bridge and traffic will be in an alternating one-way configuration. Delays are anticipated.

Beginning on Tuesday, January 15, motorists and trail users should anticipate short, intermittent holds and delays on the bridge, S. Grand Avenue and on Atkinson Trail near the construction area.

The lane-closure and holds are for construction access as crews clear the grub and trees, remove street light poles and trench for utility work in preparation for construction on the new, separated pedestrian bridge which will be built to the north of the current bridge.

Motorists should plan ahead for delays and allow extra time when travelling through the area especially during peak times (6:30-9 AM and 4-7 PM). Business access remains open. Follow flagger instructions and construction signage.

Community Informational Meeting – February 5

Please join the project team for a community information meeting on Tuesday, February 5 at the Glenwood Springs Community Center. Drop-in is 5:30-7 PM with a short presentation at 6 PM followed by a Q&A session. Learn more about the project including timeline, work activities and traffic and river impacts. Light refreshments provided.
