

Oil Shale RD&D Program Status

August 7, 2008

Jim Koffer
Technology Deployment Engineer
Chevron Corp.

Piceance Basin Regional Map

What's going on at our RD&D Site?

- Lease awarded January 2007
- Construction on location began 7/11/07
- Moved in drilling rig 11/28/07
- Cored Green River Formation 786-2619' (98% recovery)
- Ran wireline logs
- Set packer in well, came back this Spring to do hydrology testing. Results were used to design hydrology test wells.
- Cores now being studied in various laboratories
- Next phase is to drill hydrology test wells, which has recently started.

Wireline Log Near Proposed Lease (SLAPCO Fed 1-5-397)

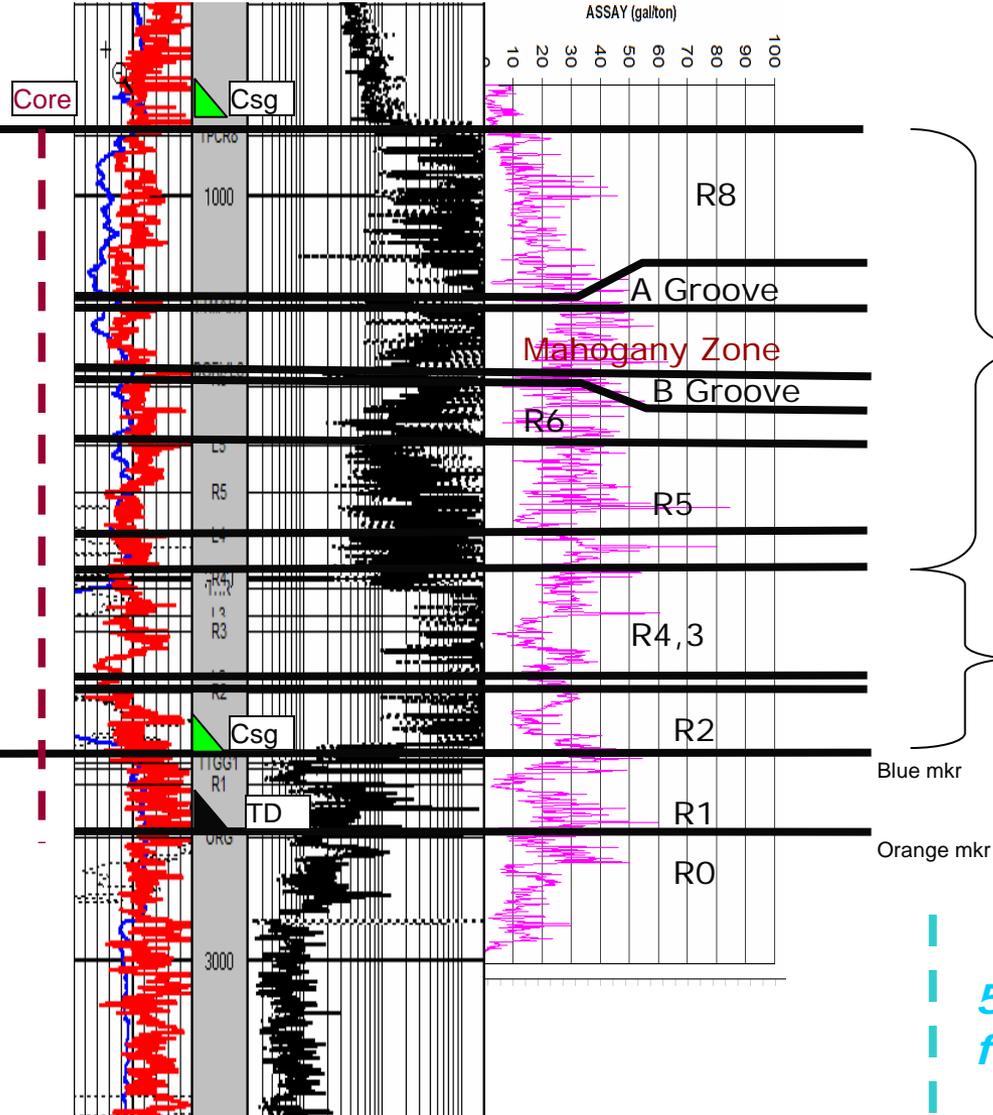

Uinta Formation

Green River Formation

Garden Gulch & Douglas Creek Members

Parachute Creek Member

Initial Test

Leached Zone

Saline Zone

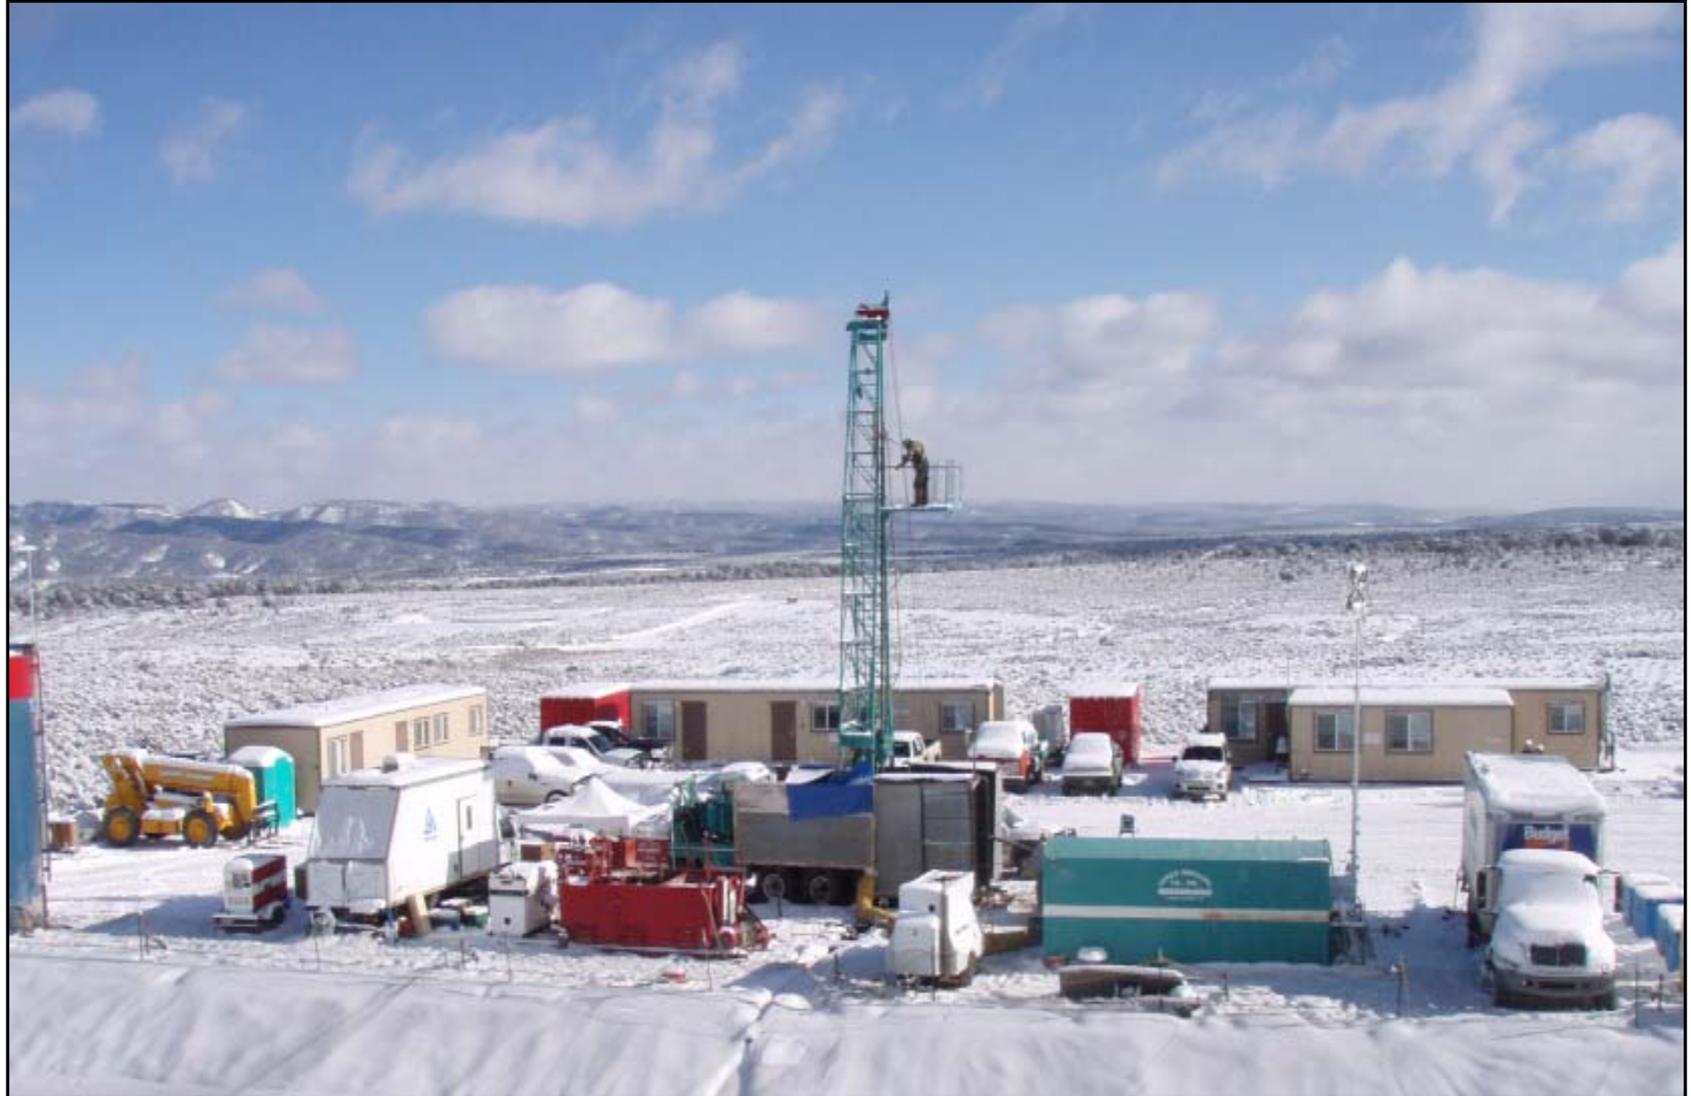

Upper Aquifer

Lower Aquifer

Set packer here

Oil Shale Coring Operations

December 2007

Preliminary Project Timeline

			Research & Field Testing							
BLM proposes oil shale leasing	Applications for oil shale leases	Start Oil Shale PEIS	BLM suitability notification Plan of Operations Environmental Assessment	Lease awarded Plans & Permits Coring & logging ★	Hydrology tests Groundwater monitoring, Reservoir modeling, Frac testing
